TEST REPORT

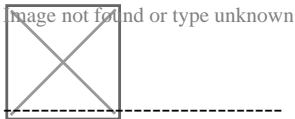

Covid-19 (RT-PCR) tested on Sample:

Undetected

Interpretation : An "Undetected" Result Indicates that the COVID-19 is Negative in the patient's specimen. An

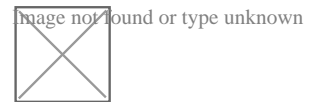

"Undetected" test result does not always exclude the possibility of COVID-19. The result should be correlated with patient's clinical history and clinical presentation.

Technical Note : Taqman chemistry based real time RT-PCR method with IVD approved pre validate kit having analytical sensitivity of 50 IU/ml was used for amplification of Covid-19 by AMPLI Lab (Adaltis, Italy).
